SOFTWARE PROJECTS

Your Pantry — [Live Demo](#) — [Repo](#)

- Designed and implemented an application that allows users the capability to check items that they have in their pantry off and a list will generate possible meal options for them to try.
- Incorporated local storage for saving favorite meals to revisit at a later time.
- Group collaboration via GitHub, Slack, Zoom
- Technologies used: Materialize CSS, Ajax, JavaScript, jQuery, REST API

Employee Tracker — [Repo](#)

- Built an interface that makes it easy for non-developers to view and interact with information stored in a database.
- Server-side application for implementing a relational database, with CRUD functionality.
- Added reusable OOP for performance optimization
- Database: MySQL
- Technologies used: JavaScript, Node.js, and various command line interfaces.

Note Taker — [Live Demo](#) — [Repo](#)

- Developed an application that can be used to write, save, and delete notes instantly.
- Application uses data to send and retrieve from JSON files.
- Technologies used: Bootstrap, JavaScript, jQuery, Node.js, Express, Heroku

EMPLOYMENT

Verse.io, San Diego, CA — *Lead Development Representative*

JULY 2019 - DECEMBER 2019

- Managed a CRM system and responded to over 100 calls and emails per day with a high level of professionalism.
- Converted inbound clients into qualified, sales-ready opportunities, using a 2-way SMS system.
- Conducted outbound outreach to introduce Verse in current verticals, including mortgage, real estate, solar energy, healthcare, and SaaS.
